

## Press Release

### Quantiq International and Top Layer Networks Announce Strategic Partnership

**Singapore – March 2, 2007** - Quantiq International Pte Ltd, a regional security architect that offers end-to-end security expertise, and Top Layer Networks, Inc the global leader for high performance intrusion prevention solutions, today announced plans for a strategic partnership.

Under the terms of the agreement, Quantiq is now authorized to distribute Top Layer's solutions in the whole of Asia.

"Top Layer is pleased to be partnering with Quantiq to deliver our award-winning intrusion prevention system solutions to their markets," said Robert Daigneault, Top Layer Vice President Worldwide Sales. "We are very impressed with Quantiq's security expertise, technical knowledge, and professionalism. We look forward to a prosperous partnership."

The partnership will enable Quantiq to expand its current suite of security offerings and provide a new level of protection to its customers.

"We are honored with the appointment by Top Layer. Being the market leader in Network Intrusion Prevention System (IPS), Top Layer has given us a head start branding and technological advantage to further bring its value to our partners and customers. With every new product representation, we will commit dedicated resources to grow the product and to gain bigger market share. I am confident we will have a significant achievement together with Top Layer and our partners." said Lim Keng Hoe, Regional Director, Corporate Strategy & Business Development of Quantiq International Pte Ltd.

#### **About Top Layer Networks, Inc.**

Top Layer Networks is dedicated to its role as leading global provider of Network Intrusion Prevention Systems (IPS), developing and bringing to market network security infrastructure solutions that help commercial and government organizations protect their critical on-line assets from the losses and risks associated with cyber threats. Its family of IPS appliances is designed with "Three Dimensional Protection" that provides the most advanced protection capabilities against known and unknown attacks at the highest performance rates. Top Layer Networks is headquartered in Massachusetts, USA with sales and support presence in Canada, Germany, Japan, Korea, The Netherlands and the United Kingdom.
